The university will spend money on dormitory to improve the life quality of students, which of the following do you think is the best way?

-providing a room for quiet study; -building an exercise room;-providing entertainment place (watch film).

~~A~~The dormitory is a place where university students spend a lot of time. That explains why a campus focuses/~~campuses focus~~ on satisfying the students through improving the quality of the dormitory/~~their dormitories~~. Since the campus decided to make the dormitory better, I would like to support ~~to-build~~ing an exercise room.

To begin with, an exercise room can help students strengthen their physical health. It is known to us all that university students ~~experience a lot of stress due to their studies/are~~ facing heavy study stress nowadays. Therefore it is necessary for them to ~~play/~~do some sports in order to guarantee ~~a-~~good physical and mental condition. Some people may argue that every school has gyms, ~~so~~ why do we ~~need to~~ put so much effort into building an exercise room in the dormitory? When students want to exercise after the gym is closed, a dormitory room is an alternative choice. And during winter, an indoor dormitory room will surely ~~be~~ warmer than an outdoor stadium. Hence we can see an exercise room in the dormitory has several advantages like warmth and convenience.

In addition, an exercise room provides a space for students to make friends and build ~~dt-~~relationships. Besides ~~being involved in~~doing sports, we can also meet new people in the dormitory room. I used to practice dancing by myself in the corner of the exercise room of my dormitory ~~u-~~Until one day I noticed a girl dancing ~~to-~~following the music. I ~~decided~~tried to invite her to practice with me and that was how our friendship began.

The other two choices seem reasonable at first glance, but they have ~~shortcomings/disadvantages~~ after deep thought. There are many libraries and 24-hour coffee shops, ~~and/so~~ students can easily find a quiet place to finish their assignments and prepare for the exams. There is no need to waste money on building a study room. As for the entertainment room, it will cause noises and ~~badly/negatively~~ influence the life quality of other students. After all, the dormitory is a place for rest.

In a word, ~~the best plan for the school is to build~~ an exercise room ~~will be the best plan for the school to build~~ inside the dormitory ~~since~~. ~~While~~ it will also ~~increase~~ improve the satisfaction of the campus students.

Title: once children start school, teachers have more influence than parents on their intellectual and social development. To what extent do you agree or disagree?

Schools are ~~the~~ important places ~~for~~ education and teachers are ~~a~~ the vital part. In my view, teachers can help develop students' intellectuality and promote social development.

Teachers ~~choose/select~~ decide indoor and outdoor activities, which is beneficial to students' ~~intelligence/learning ability~~ intellectuality [1] and social development. Since teachers have undergone specialized training and they are familiar with educational ~~knowledge~~. They will design relevant activities such as ~~learning~~ knowledge games and field research for their students. Encouraging students to think actively ~~to~~ and find some useful answers for society ~~is~~ are the main function of ~~school~~ activities. In contrast, parents who lack an in-depth knowledge of curriculum content may not be able to help their children.

On the other hand, students can develop their own ~~academic understanding/comprehension/study skills/capabilities~~ intellectuality and society ~~would be able to~~ could make progress because teachers provide students with guidelines and rules. Teaching methods ~~can~~ could change children's views toward different things like learning habits and communication skills. ~~The r~~ Right attitude helps ~~to~~ apply students ~~to~~ at study and ~~applying the~~ knowledge gained from learning boosts social development.

However, parents can discipline and interact with their children when children stay at home. Parents are more willing to help their children to develop good learning habits and social manners. Therefore, ~~a~~ student may perform well at school and become a

responsible citizen. In ~~the~~ long term, society will be increasingly helpful for their ~~development/maturity/adulthood~~ developmental.

In conclusion, although parents are their first teachers ~~of children~~, children will spend massive/a lot of/a great deal of/substantial time with teachers once enrolled ~~in~~ on schools. Therefore, I believe that teachers are more essential to students than their parents.

[1] Very good work! But please try to avoid using the same 'big' words too often. It is always best to use different words that mean the same thing, i.e., synonyms, whenever possible.
